Accessible toilet lock with HEX head release

The **JEFLOCK** Accessible toilet lock is designed especially to comply with new legislation Part M, DDA & BS8300.

The accessible toilet lock operates from the outside with a lever handle to release the roller latch bolt & has a red & white indicator release, in an emergency the HEX head release can be turned by a HEX head key to release the dead bolt. The outside operation is no different to any other bathroom lock & does not require instructions.

The inside lever handle presses down to release the latch bolt & lifts up to throw the dead bolt as illustrated. This is an unusual feature & therefore has a sign to read 'lift handle to lock' this message is repeated in Braille.

The unique **JEFLOCK** Accessible toilet lock with HEX head release is supplied as a complete set with HEX key

Metal finishes - Satin stainless steel

Lockset : Satin stainless steel forend & strike plate. Roller bolt latch (less likely to cause injuries or damage to clothing than a normal latch bolt).
Separate deadbolt with 78mm centres and 57mm backset.

Furniture: Grade 316 Satin stainless steel, 19mm diameter lever handles with bolt through secure fixings.
Grade 316 Satin stainless steel HEX head release.
HEX key

Lettering: Black letters on white background & Braille to read 'lift handle to lock'

Extras: Double lipped strike plate for double action doors

The Hex release version is available for use in applications that are relevant to the Department for Education Technical Annex 2D: Internal Elements and Finishes.

Part 5.2.2. Part C. refers to Bathroom Locks and states: Bathroom Lock . A lock that can be locked from the inside by turn or lever and can be released from outside by hexagon or star key (not coin-slot).
